

- d) optionally, Enzyme D, starting from the month following the last administration of Enzyme C, at a concentration generally within a range of 5 [to] and 7 U.I. in about 0.4 ml of physiological solution for approximately three consecutive days, at monthly intervals, for about three months and for each eye.

Claim 10 (currently amended) [A] The method [in accordance with] set forth in [C]claim 9, wherein the concentration of Enzyme A is about 0.04 U.I. in about 0.4 ml of physiological solution, the concentration of Enzyme B is approximately 6.67 U.I. in about 0.4 ml of physiological solution and the concentration of Enzyme C is about 8 U.I. in around 0.4 ml of physiological solution, the concentration of optional Enzyme D being equal to approximately 8 U.I. in about 0.4 ml of physiological solution.

REMARKS

The captioned Application has been amended to comport with U.S. practice, and, in so doing, to better define the invention without limiting effect. No new matter has been

added. Favorable consideration of this Application on the merits is earnestly solicited.

Respectfully submitted,

Dated: March 31, 2005
